Comments: _____

 University District
 1200 Hilyard St., Suite 330
 Eugene, OR 97440

 RiverBend Pavilion
 3377 RiverBend Dr., #150
 Springfield, OR 97477

Ultrasound (also known as sonography) uses sound waves to image internal body organs and structures. To acquire the images, a sonographer will put a warm gel on your skin and move a probe (or transducer) back and forth over the surface of your body.

If you have any questions regarding your exam, please feel free to contact us:

General Scheduling: (541) 334-7555
