WHAT TO EXPECT

A PET/CT scan combines PET and CT imaging to create detailed images of your body's organs and tissues while identifying areas of abnormal metabolic activity. A prostate-specific PET/CT scan is used to evaluate prostate cancer by assessing tissues at the cellular level. The exam is generally painless but does require patience.

BEFORE YOUR EXAM

WEAR COMFORTABLE CLOTHING

Wear comfortable, loose-fitting clothing that is easy to remove if needed.

DRINK WATER

Hydration is important. Drink plenty of water before your appointment to help ensure you are well hydrated.

EAT NORMALLY

You may eat and drink normally unless instructed otherwise by your physician.

IMPORTANT

The imaging agent used for your PET/CT scan is prepared specifically for your appointment. If you need to cancel or reschedule, please notify us at least 24 hours in advance.

Questions before your exam? Please contact our PET/CT Scheduling team at **(458) 215-4040.**

YOUR PET SCAN JOURNEY

1. You will receive appointment reminder notifications beginning 4 days before your exam, including a link to our What to Expect video.
2. Arrive at your scheduled arrival time. Plan to be at our imaging center for about 2 hours.
3. You'll receive your injection, then relax in a quiet recliner for approximately 60–90 minutes while the tracer circulates through your body.
4. Your PET/CT scan takes approximately 15-30 minutes, depending on your exam. Please remain as still as possible during imaging.
5. Continue drinking plenty of water throughout the remainder of the day. You may resume your normal diet and activities.
6. A specialized radiologist will interpret your exam and send the report to your referring provider, typically within 24 hours.
